PROFESSIONAL SUMMARY

Motivated Software Engineer with hands-on experience in full-stack web development using Python, Django, HTML, CSS, JavaScript, and MongoDB. Proven ability to design and deploy scalable web applications from end to end. Actively expanding expertise in Cloud Computing (AWS), DevOps automation, CI/CD pipelines, and Infrastructure as Code. Seeking a software engineering role to contribute to high-performance engineering teams while growing in cloud and DevOps disciplines.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Web Technologies: HTML5, CSS3, Django, REST APIs

Databases: MongoDB

Cloud and DevOps (Familiar): AWS (EC2, S3), CI/CD Pipelines, Infrastructure as Code

Version Control and Tools: Git, GitHub, VS Code

Soft Skills: Communication, Time Management, Problem Solving

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

Bethlahem Institute of Engineering, Kanyakumari, Tamil Nadu

Area of Interest: Full-Stack Development, Cloud Computing

EXPERIENCE

Software Development Intern, Crescent Infotech

- Developed 3+ intelligent software prototypes by applying machine learning and data processing concepts, reducing manual data handling time by approximately 30%.
- Completed end-to-end software development workflows across 2 project cycles, improving delivery speed and code quality.
- Collaborated with a team of 5 developers to build and test data-driven solutions, strengthening Python programming and analytical skills.

Industrial Visit Participant, Srishti Campus

- Observed agile project management workflows used across 4+ enterprise software teams, gaining insight into real-world DevOps and deployment practices.
- Identified 3 key areas for personal skill development in cloud infrastructure and CI/CD automation based on enterprise technology exposure.

PROJECTS

E-Commerce Web Application (HTML, CSS, JavaScript, Django, MongoDB)

- Designed and developed a fully functional e-commerce platform with 5+ core modules including product listing, shopping cart, and user authentication.
- Reduced page load time by optimizing front-end components across 10+ responsive UI pages built with HTML, CSS, and JavaScript.
- Implemented a structured Django and MongoDB backend handling 3 data models (products, orders, users), following MVC architecture for maintainable code.

CERTIFICATIONS

Web Development, NOVI TECH | Data Science using Python, VEI | Python Full Stack, E-MAX | Interaction Design and Prototyping, FEATHER | Cloud Devops , SLA

AREAS OF INTEREST

AWS Cloud Infrastructure | DevOps Automation | CI/CD Pipelines | Infrastructure as Code | Full-Stack Web Development | Scalable Application Architecture
